

Engineering Manager | Distributed Systems | Platform & Architecture

Technical leader experienced in scaling high-traffic systems, modernising legacy platforms, and leading engineering teams to deliver resilient, high-quality software at pace.

Experience

Engineering Manager

Dec 2025 - Present

BPP University

Lead a team of 10 engineers across 2 teams to deliver multiple high priority projects with aggressive delivery timelines. Projected for £1.8M revenue in the first year.

Owned the technical strategy and architectural decisions for high-traffic web platforms.

Modernised legacy technology and introduced scalable platform patterns to improve reliability and adhere to CE+ regulations.

Mentored engineers across seniority levels to increase their ownership and system comprehension

Lead Software Engineer

Aug 2025 - Dec 2025

BPP University

Lead the creation of a brand new micro learning platform. I personally led discovery with stakeholders, architected the solution, managing budgets, and sourcing staff.

Implemented ways of working for the newly formed team and drove agile working practises.

Skills

- **Engineering Leadership**
- Engineering Management
- Technical Strategy & Roadmapping
- System Design & Architecture
- Cross-functional Stakeholder leadership
- Mentoring & Team Development
- Agile working practises
- Technical Writing
- **Distributed Systems & Architecture**
- High-Traffic Web Architecture
- Microservices & EDA
- API Design
- Platform Engineering
- Scalability & Performance Optimisation
- Reliability & Observability patterns
- C4 Model & Architectural Documentation
- **Languages & App development**
- Typescript
- Node.js
- Rust
- Next.js
- **Cloud & Infra**
- AWS (Serverless, Lambda, API Gateway, ECS, DynamoDB, S3 etc.)
- Infrastructure as code (Terraform)
- Docker
- Cloudflare (R2, Workers etc.)
- Linux
- **Data & Storage**
- PostgreSQL, MySQL
- DynamoDB, MongoDB

Experience Continued

Fractional Head of Engineering

Aug 2025 - Feb 2026
Propeller

Lead the digital transformation from a legacy system to a serverless AWS solution and transition to git. This led to increased deployment velocity and customer satisfaction.

Senior Software Architect

Nov 2023 - Aug 2025
BPP University

Lead projects for a digital transformation of education business. Successfully saved over \$300,000 in cloud costs whilst increasing system capacity and resiliency.

Skills: Event Driven Architecture, AWS, C4, BPMN 2.0, UML

Solutions Architect (Contract)

May 2022 - Jun 2023
BlueLightCard

Created a new serverless cloud architecture, and aided the team to migrate from their current on-premise system.

Skills: Typescript, Node.JS, Lambda, DynamoDB, C4 Design

Principal Software Engineer (Contract)

Oct 2020 - Present
York Press

Leading a team of 5 engineers to build an E-Learning platform delivering multi-media learning experiences to their customers.

Skills: Typescript, NodeJS, ECS, Lambda

Tech Principal (Contract)

Nov 2021 - Jan 2024
Alphageek

Optimised performance and introduced resiliency measures for large e-commerce websites built with Wordpress.

Products

LoginLlama

Apr 2023 - Present
Suspicious Login detection platform - powered by AI. I created this after building similar solutions for my clients whilst freelancing.

RepoWarden

Feb 2026 - Present
Automated project maintenance powered by AI.

Bucketscan

June 2024 - Present
Virus detection and malware platform for cloud based storage. I created this based on a problem I had observed at work which didn't have a good solution on the market.

PlanPacer

October 2025 - Present
Instalment plans designed for the hospitality industry. I created this for a client and spun it out into it's own product. Used by a number of businesses across the world.

Experience Continued

Senior Software Engineer (Contract)

Aug 2021 - December 2021

Web3.storage

Collaborated with engineers to enhance the web3.storage platform using cutting-edge technology, led re-architecture efforts on the storage calculation service, enabling additional revenue-generating features.

Skills: Javascript, GitHub Actions, IPFS

Lead Software Engineer (Contract)

Jan 2021 - Jan 2023

Givetap

Elevated a charity platform with a dynamic fundraising feature, spearheaded CI/CD integration, and transitioned to AWS ECS Fargate, turbocharging platform performance and speed.

Skills: Angular, Typescript, Terraform

Lead Software Engineer

July 2019 - Oct 2020

Cappfinity

Leading a product overhaul at Cappfinity, I cut costs by a 33%, bolstered security, introduced efficient systems, and accelerated project pace with bi-weekly sprints and strategic meetings.

Skills: Python, Terraform, Typescript

Software Engineer

Feb 2018 - July 2019

Cloudcall

Integrated GDPR, messaging features into a telecom app, led the platform team in creating a public API and documentation, maintained backend communication services, and became the go-to person for issue resolution, impacting 27,000 users across 500 global companies.

Skills: Typescript, NodeJS, DynamoDB, RabbitMQ

Experience Continued

Full Stack Developer

Jan 2017 - Feb 2018

Frogspark

Led the development of large-scale web applications across various industries, including housing surveyors (SurveyorsNearMe) and meal delivery services (FreshFitnessFood). Collaborated closely with clients to translate their requirements into actionable technical specifications. Spearheaded the implementation of source control, deployment procedures, and server tools to streamline the development process. Primarily worked with PHP, Laravel, MySQL, and front-end JavaScript to deliver high-quality, user-centric applications.

Skills: PHP, Wordpress, Laravel, Linux, MySQL, Javascript

Software Developer

Apr 2016 - Dec 2016

Eduspot

Lead developer of a parents evening product used by over 150,000 parents, from 700 schools, in 3 different countries.

- Created a robust API to handle the sending of over 500,000 parent invitations at once.
- Translating feedback from customers to features that solved their use case.
- Built upon and maintained an area for schools to create and manage their parents evenings as well as a mobile and desktop site for parents to book appointments.

Skills: Javascript, TSQL, HTML, CSS

Education

Aerospace Engineering

2013 - 2015

Loughborough College/Leicester Space Centre

Completed an A-Level in Physics, A-Level in Mathematics and a BTEC Level 3 in Engineering.

GCSE's

2011-2013

Rawlins Community College

Physics(A), Biology(A*), Chemistry(A), Mathematics(B), History(B), French(B)

Other Education Certificates

Bronze and Silver Science CREST Award

Selected from my school to take part in this prestigious training that included designing and carrying out practical experiments, working with groups and advancing our knowledge of the sciences.
